SUMMARY

Backend Engineer with 4.5+ years of experience designing and developing scalable FinTech and Telecom platforms using Java and Spring Boot. Experienced in distributed systems, payment middleware, event-driven architectures, and high-throughput microservices serving millions of users. Strong focus on system design, reliability, idempotent processing, and integration-heavy backend systems.

SKILLS

Backend	Java, Spring Boot, Spring Security, Go, Python
Messaging	Kafka, RabbitMQ
Databases	PostgreSQL, Redis, Oracle, MongoDB, Cassandra
Infrastructure	Docker, Kubernetes, APISIX, Gradle, Maven, Flyway, Liquibase
Observability	OpenTelemetry, Prometheus, Grafana, ELK
Architecture	Hexagonal Architecture, Event-Driven Systems, Outbox Pattern, Debezium, CQRS, SAGA, API Gateway, Payment Middleware, SOAP/REST Integration

COMPETITIVE PROGRAMMING

Solved 600+ algorithmic problems – [LeetCode](#) — [Codeforces](#) — [CSES](#)

EXPERIENCE

Senior Software Engineer Brain Station 23 , Dhaka, Bangladesh	January 2026 – Present
---	------------------------

- Contributed to the development of Banglalink's payment service provider (PSP) middleware integrating Huawei Mobile Money 2.0 for P2M, P2P, bill payment, and mobile recharge workflows.
- Developed event-driven payment services using APISIX, Kafka outbox pattern, Redis idempotency, and PostgreSQL for reliable asynchronous transaction processing.
- Developed backend services for [Zoober Pay](#), including eKYC onboarding, wallet management, card top-up flows, and AML screening integrations with [Nuvei](#) and [ComplyAdvantage](#).

Senior Software Engineer Red.Digital Limited , Dhaka, Bangladesh	May 2022 – December 2025
--	--------------------------

- Contributed to the backend development of Robi's Nextgen Loyalty Platform serving 60M+ subscribers with sustained peak throughput of 1,200 TPS.
- Developed scalable Spring Boot microservices with Kafka and RabbitMQ for telecom order, notification, and workflow automation systems, reducing manual operational handling by 40%.
- Built resilient backend services and fault-tolerant batch processing workflows for [Smart Axiata](#)'s eCRM platform.
- Received Spotlight Award (Q2 & Q3 2023) and Employee of the Month (February 2023) for engineering contributions and delivery impact.

EDUCATION

B.Sc. in Computer Science & Engineering Khulna University of Engineering & Technology (KUET)	2017 – 2022 CGPA: 3.43 / 4.00
--	----------------------------------

PROJECTS

- **Event-Driven E-Commerce Platform** — Implemented SAGA-based distributed transactions, Kafka-driven asynchronous communication, API Gateway routing, and fault-tolerant microservices architecture. *Spring Boot, Kafka, Docker, Resilience4j, Micrometer*
- **Banking System** — Implemented monolithic and microservices-based banking systems with transaction isolation, distributed consistency handling, authentication, and event-driven workflows. *Spring Boot, Kafka, Spring Security*
- **REST API in Go** — Developed a clean-architecture REST API for student, teacher, and course management with layered service design. *Go, Gin, PostgreSQL, Docker*
